

# Sales & Revenue Analysis Dashboard

Superstore Dataset · Power BI Insights Report

## Executive KPI Summary

|             |              |              |                 |
|-------------|--------------|--------------|-----------------|
| 2.30M       | 286.40K      | 5K           | 793             |
| Total Sales | Total Profit | Total Orders | Total Customers |

## 1. Sales Performance by Category

| Category        | Total Sales | % of Total | Rank |
|-----------------|-------------|------------|------|
| Technology      | \$0.84M     | 36.5%      | #1   |
| Furniture       | \$0.74M     | 32.2%      | #2   |
| Office Supplies | \$0.72M     | 31.3%      | #3   |

Technology leads all categories with \$0.84M in total sales (36.5% share), driven by high-ticket items such as copiers, phones, and machines. Furniture and Office Supplies follow closely, suggesting a well-diversified product portfolio. Promotional investment in Office Supplies could close the gap with Furniture.

## 2. Revenue Distribution by Customer Segment

| Segment     | Revenue | % Share | Strategic Priority     |
|-------------|---------|---------|------------------------|
| Consumer    | \$1.16M | 50.56%  | High – Core Segment    |
| Corporate   | \$0.71M | 30.74%  | Medium – Growth Target |
| Home Office | \$0.43M | 18.70%  | Medium – Niche Growth  |

The Consumer segment dominates at 50.56% of revenue, underpinning most of the business. Corporate clients (30.74%) represent a scalable B2B opportunity — increasing dedicated account management and volume discounts could accelerate this segment. Home Office (18.70%) is the smallest but fastest-growing niche, particularly post-pandemic.

## 3. Regional Profit Analysis

| Region | Approx. Profit | Performance | Recommendation                   |
|--------|----------------|-------------|----------------------------------|
| West   | ~\$108K        | Strongest   | Replicate model in other regions |
| East   | ~\$91K         | Strong      | Sustain & grow                   |

|         |        |            |                                  |
|---------|--------|------------|----------------------------------|
| South   | ~\$46K | Below Avg. | Review product mix & pricing     |
| Central | ~\$39K | Weakest    | Cost audit & sales push required |

West and East are the profit powerhouses. Central region's comparatively low profit (\$39K) despite reasonable sales volume suggests elevated costs or heavy discounting. A deep-dive into Central's discount policies, shipping costs, and product returns is recommended.

## 4. Monthly Sales Trend

Sales demonstrate a clear upward trajectory from January through December. Notable observations:

- Q1 (Jan–Mar): Low sales (~\$0.1M/month) — likely seasonal dip post-holiday season.
- Q2–Q3 (Apr–Sep): Steady growth phase, crossing \$0.2M–\$0.3M monthly.
- Q4 (Oct–Dec): Peak performance with sales approaching \$0.35M–\$0.4M, aligning with back-to-school and year-end procurement cycles.
- Recommendation: Pre-load inventory in Q3 and ramp marketing spend in September to capture Q4 momentum early.

## 5. Top 6 Products by Revenue

| Product                               | Sales (\$) | Profit (\$) | Margin |
|---------------------------------------|------------|-------------|--------|
| Canon imageCLASS 2200 Advanced Copier | 61,599.82  | 25,199.93   | 40.9%  |
| Fellowes PB500 Binding Machine        | 27,453.38  | 7,753.04    | 28.2%  |
| GBC DocuBind TL300                    | 19,823.48  | 2,233.51    | 11.3%  |
| GBC Ibimaster 500 Manual ProClick     | 19,024.50  | 760.98      | 4.0%   |
| HON 5400 Series Task Chairs           | 21,870.58  | 0.00        | 0.0%   |
| Cisco TelePresence EX90               | 22,638.48  | -1,811.08   | Loss   |

The Canon imageCLASS copier is the star product, generating nearly \$62K in sales with a healthy 40.9% margin. The Cisco TelePresence unit is a loss-making SKU (-\$1,811 profit) and should be reviewed for pricing strategy or de-listing. HON chairs contribute zero profit despite \$21K in sales, indicating heavy cost-of-goods pressure.

## 6. Strategic Key Insights & Recommendations

**Technology is the growth engine.**

At \$0.84M, it outperforms other categories. Expand the technology product range to sustain leadership, especially in high-margin sub-categories like copiers.

**West region is the profit champion.**

\$108K in profit — analyse and replicate the sales playbook (pricing, product mix, customer targeting) in Central and South regions.

**Consumer segment drives half of all revenue.**

Loyalty programs, subscription offers, and personalised marketing can deepen retention in this critical segment.

**Profit margin stands at 12.47%.**

Below industry best practice (~15–20%). Target loss-making SKUs (Cisco TelePresence), renegotiate supplier costs, and reduce discount depth in low-margin categories.

**Seasonal peaks are predictable.**

Q4 consistently over-performs. Build seasonal campaigns, optimise logistics lead times, and pre-position inventory in high-demand regions by late Q3.
